1 - Heading one

This is first heading

Heading two

Heading three

Heading four

2- Block of words

this is block of normal text

this is block of special words

this is second block of special words

3- line breaks

this is python practice course.

and my name is azeem aslam

this is python practice course. we can break a line by using farword slash symble.

and my name is azeem aslam

4- face of text

this is bold text

this is itylic text

this is bold and itylic

you can use these symbols _ underscore

bold

italic

5- bolit points and list

- day 1
- day 2
- day 3
- day 4
 - day 4a
 - day 4a 1
 - day 4b
- day 6

numbring of list.

1. day1
2. day2
3. day3
 - 3. day3a
 - 4. day3b
4. day4
5. day5

6 line or page break

9 adding code

this is helo word `print(hello)`

This color show that we are in python langaue

```
x = 1
y = 2
z = x+y
print(z)
```

this color shows that we are in r language

```
x = 1
y = 2
z = x+y
print(z)
```

10 adding tables

Syntax	Description
Header	Title
Paragraph	Text

alliging this text of table. pipe (|) character separates the individual columns in a table. (-) hyphens act as a delimiter row to separate the header row from the body. 😊 colon to align cell contents.

To left-align a column, put a colon to the left of the hyphen (:-). Put a colon to the right of the hyphen (-😊 to right-align a column. To center-align, surround the hyphen with two colons on both sides (:-😊😊). We'll also wrap the second row with pipes.

Syntax	Description	Test Text
Header	Title	Here's this
Paragraph	Text	And more
